FLIPPER FLEX G2

Zitzi Flipper Flex G2

In- and outdoor underframe

Improved tilt placement

On the Flipper Flex G2, the tilt gaspiston is attached centered under the seat, which provides increased stability and better force distribution on the chassis.

Manual or electric height and tilt adjustment

Flipper Flex G2 is available with manual or electric height adjustment. It is also available with electric tilt adjustment.

New footrests

The Flipper Flex G2 has a new series of footrests that fit all G2 underframes.
They all have two stays and are available in several different designs depending on need and function.
