YPSI EXPERT

The new stroller for children from 2 to 6 years designed in collaboration with Peg Perego, fast and easy to handle, very light but with all the necessary precautions for good postural control and excellent support during walks.

Ypsi is foldable and allows you to rotate the seat facing mum or facing the street, in one step!

Adjustable footplate in height and inclination

Postural position adjustment

Smooth and quick backrest adjustment, allowing you to adjust the support provided by the backrest at the front and rear, from a relaxed, reclined position to a more active one.

Folding

Ypsi is a stroller with an extremely simple and fast folding system, which makes it compact and easily fits into the trunk of any car (only 59.5 x 88.5 x 42 cm when closed!).

The frame is made of aluminum, light but very resistant, ideal for daily walks.

Hood, footrest and basket fold together with the stroller to leave the caregiver's hands free!

Fast and light

Even with the maximum load (30 kg) Ypsi remains an easily maneuverable and agile stroller.

The frame of the base is very light and the seat has been designed to offer all the necessary supports to personalize the postural structure: pelvis side pads in different sizes, an abductor belt, a containment belt at the trunk level are perfect to maintain the correct postural position during walks.

The push handle is height adjustable to fit all caregivers. The footplate can be adjusted in height and inclination and postural position in inclination.

Hood with sun protection FP50!

... and for the rain it also mounts the transparent protection!

Facing the world or mum?

One move and turn the seat towards mum!

The seat can be tilted up to -60°, and offers a series of adjustments to follow the child's growth:

• headrest, chest belt, and footrest are adjustable in height;

• the seat is adjustable in width and depth; the front of the seating cushion is higher;

• the adjustable anatomic hip belt holds without compressing.

Accessories

Ypsi includes a retractor, a chest belt, a headrest and a seat cushion kit in 2 sizes for postural containment; the hood, bumper bar and storage basket are also supplied as standard. Other accessories to complete it:

• crystal rain cover and thermal bag

• drink holder

• tray with food container

• rear footboard to take the little brother or sister for a walk

• large off-road fixed front wheels (like the rear ones)

• bag or backpack, with mattress to change the baby

• umbrella, optionally black or beige

YPSI CITY

The new stroller, available in two sizes, covers the 1-3 age range and completes the product line for everyday travel with little ones.

A super-compact, easy-to-maneuver frame, combined with a seat with good postural support, suitable for use from early childhood.

Height- and recline-adjustable platform

360° swivel castors

2 super compact sizes

The Ypsi City is a “mini” folding stroller with a compact frame, making it very maneuverable and lightweight.

The size 1 wheels are small and smooth-rolling, while the size 2 wheels are large and perfect even on dirt roads.

The overall dimensions are just a few centimeters beyond the seat, offering the perfect combination of containment, support, and practicality from early childhood.

Lots of features!

Ypsi City provides good postural control thanks to strategically placed straps and supports.

A series of adjustments accompany the child throughout the day:

- Backrest recline
- Seat depth adjustment
- Height-adjustable footrest and knee flexion/extension.

5-point harness, adjustable

With Ypsi City everywhere

The Ypsi City is easy to use in a variety of environments, whether for walks or in the city, or for transport in the car or on public transport: a sliding frame that's easy to fold quickly when needed, lightweight and compact.

The new padding is soft and breathable for maximum comfort.

Furthermore, the seat can be positioned forward-facing or rear-facing.

All inclusive

An ergonomically optimized structure for both the child and their caregiver, offering:

- Height-adjustable wraparound headrest
- Semi-rigid thoracic belt adjustable in height and depth
- Lateral supports for pelvic width management
- Retractor
- Five-point harness.
