fumagalli Care&Reha

SHIFU

Range of postural standing frames made up of three models: AIR for supine standing, EARTH for prone standing and OCEAN for supine/prone standing. Each model is available in several sizes to meet the needs of different age groups, from children and teenagers to adults.

All models have a light, extremely manoeuvrable frame, designed to be used even in tight spaces or easily stored when not in use. The special shape of the base allows the carer to get as close as possible to the person, or to bring the standing frame right up to the bed or wheelchair without obstruction, thanks in particular to the clearance under the base (no less than 20 cm!) and the practical swivel castors with brakes.

SHIFU OCEAN

From lying to standing!

The plane is tilted smoothly, without jerks, by a gas spring operated by a pedal for sizes 1 and 2, and by an electric motor for size 3.

The plane has a very wide range of tilt, from horizontal to vertical, to allow access to different assistive devices and to offer the person truly progressive weight bearing.

Each model is made up of functional modules, designed to allow maximum customisation and to guarantee a suitable support surface for different rehabilitation pathways.

Adjustments are easy and very quick to make.

The structure

Shifu guarantees comfort, stability and safety thanks to modular elements that fit together to create customised supports, adapted to the different therapeutic needs of the therapist and the user.

Each standing frame has a padded plane to support the body, progressively adjustable in tilt and length to fit the person's dimensions.

The footrests are adjustable in height, foot spacing, internal/external rotation and flexion-extension, independently of each other.

SHIFU AIR

SHIFU EARTH

Also for adults!

The three models in size 3, specific to adults, feature low-voltage electric tilt adjustment, with a remote control that lets the user change position independently.

Although designed for professional use, their ease of use and compact dimensions also make them suitable for home use.

Ocean, Air or Earth?

Shifu OCEAN is a reversible standing frame that switches from the PRONE to the SUPINE posture and back in a few simple steps: it is supplied with all the accessories needed for both uses, and the support plane is designed so that its length can be adjusted.

Shifu AIR is the standing frame for the SUPINE posture, while EARTH is intended for the PRONE posture: choose the most suitable configuration and size, and add accessories for perfect support!
